

JOB DESCRIPTION

Trailer Chassis/Parts Welder

Overall purpose of job:

To produce a variety of trailer chassis/parts to required production plan and quality standards while practising good housekeeping and operating within Health and Safety regulations.

Key tasks: Chassis:-

To produce trailer chassis;

- Ensure all welds are of good quality paying particular notice to the beam mounting and drawbar structures
- All holes and bracketing are in the correct position
- Drain holes are in place to enable galvanising
- Overall finished chassis are to the dimensions of the drawings issued
- Check equipment regularly and report any faults to maintenance
- Keep work area tidy and operate within Health and Safety regulations at all times

Key tasks: Parts:-

To produce trailer chassis parts;

- Ensure all welds are of good quality
- All parts are made to specified drawings using jigs
- All parts of the same type are identical and therefore interchangeable
- Check equipment regularly and report any faults
- Keep work area tidy and operate within Health and Safety regulations at all times
- Liaise with materials handlers to ensure parts stock levels in the welding bays do not fall below the agreed acceptable level.
